resistance is a product of will times means carl von clausewitz postulated in his treatise on war in his 1993 bombs cities and civilians which the american historical review judged must reading for anyone interested in the subject of air warfare conrad c crane focused on the moral dimension of american air strategy in world war ii specifically the allied effort to break the enemy s will through targeting civilians with decades of research and reflection and a wealth of new material at his command crane returns to the subject of america s wwii airpower strategy to offer an analysis fully engaged with the means side of clausewitz s equation the design and impact of strategic bombing of the enemy s infrastructure and thus its capacity to fight a marked advance in our understanding of the use of airpower in war in general and the second world war in particular crane s work shows how despite an undeniable lack of concern about civilian casualties in germany and japan late in the war american strategic bombing in wwii consistently focused on destroying the enemy s war making capacity instead of its collapsing will further crane persuasively argues that in the limited wars since then separating such targets has become increasingly more difficult and all air campaigns against states have subsequently escalated to accept greater risks for civilians american airpower strategy in world war ii also provides an expanded close look at the use of airpower in the last three months of the strategic air war against germany when so many bombing missions relied upon radar aids as well as the first direct comparison of 8th and 15th air force bombing campaigns in europe the result is the most coherent and concise analysis of the application and legacy of allied strategic airpower in wwii and a work that will inform all future practical and theoretical consideration of the use and the role of airpower in war

it s hard to watch the news scroll through social media or listen to the radio without hearing or seeing something disturbing about the climate emergency this can trigger all sorts of emotions worry anger sadness guilt and even grief but also often over looked positive emotions like motivation connection care and abundance that support mental health and climate action for sustainable longevity written by psychologists with extensive experience in treating people with eco anxiety this book shows you how to harness these emotions validate them and transform them into positive action it enables you to assess and understand your psychological responses to the climate crisis and move away from unhealthy defence mechanisms such as denial and avoidance ultimately it shows that the solution to both climate anxiety and the climate crisis is the same action that is sustainable for you and for the planet and empowers you to take steps towards this

monsters are a part of every society and ours is no exception they are deeply embedded in our history our mythos and our culture however treating them as simply a facet of children s stories or escapist entertainment belittles their importance when examined closely we see that monsters have always represented the things we fear that which is different which we can t understand which is dangerous which is other but in many ways monsters also represent our growing awareness of ourselves and our changing place in a continually shrinking world contemporary portrayals of the monstrous often have less to do with what we fear in others than with what we fear about ourselves what we fear we might be capable of the nineteen essays in this volume explore the place and function of the monstrous in a variety of media stories and novels like baum s oz books or gibson s neuromancer television series and feature films like the walking dead or edward scissorhands and myths and legends like beowulf and the loch ness monster in order to provide a closer understanding of not just who we are and

who we have been but also who we believe we can be for better or worse
