this book guides readers to transition their teaching to learning centred practices based on weimer s 2002 2013 and blumberg s 2009 2019 framework the authors describe their faculty learning community based journey through the adaptation implementation and assessment of a series of practical learning centred teaching strategies while furnishing a critical discussion of challenges directions and development of learning centred pedagogy as applied to an asian context this book provides suggested pathways for educators around the world to embark on their own journey toward learning centred teaching these pathways cover a range of disciplines and teaching contexts from architecture and engineering to systems thinking and general education illustrating the robustness and flexibility of learning centred teaching the authors provide examples of good teaching practice to help instructors instructional designers faculty developers and university administrators see how principles of learning centred teaching and assessment can translate practically into quality classroom teaching and learning the rigorous assessment methodology is both highly reflective and readily applicable to teaching assessment and portfolio development it also shows how blumberg s 2019 rubrics and cole stavros 2019 soar strengths opportunities aspirations and results framework can be used to evaluate the impact of interventions contributing unique insights this is a valuable guide for anyone interested in implementing student learning centred pedagogical approaches and using rubrics for assessing teaching practice

science inquiry argument and language describes research that has focused on addressing the issue of embedding language practices within science inquiry through the use of the science writing heuristic approach in recent years much attention has been given to two areas of science education scientific argumentation and science literacy the research into scientific argument have adopted different orientations with some focusing on science argument as separate to normal teaching practices that is teaching students about science argument prior to using it in the classroom context while others have focused on embedding science argument as a critical component of the inquiry process the current emphasis on science literacy has emerged because of greater understanding of the role of language in doing and reporting on science science is not viewed as being separate from language

and thus there is emerging research emphasis on how best to improving science teaching and learning through a language perspective again the research orientations are parallel to the research on scientific argumentation in that the focus is generally between instruction separate to practice as opposed to embedding language practices within the science classroom context
