it has been said that every generation of historians seeks to rewrite what a previous generation had established as the standard interpretations of the motives and circumstances shaping the fabric of historical events it is not that the facts of history have changed no one will dispute that the battle of waterloo occurred on june 11 1815 or that the allied invasion of europe began on june 6 1944 what each new age of historians are attempting to do is to reinterpret the motives of men and the force of circumstance impacting the direction of past events based on the factual social intellectual and cultural milieu of their own generation by examining the facts of history from a new perspective today s historians hope to reveal some new truth that will not only illuminate the course of history but also validate contempo rary values and societal ideals although it is true that tackling the task of developing a new text on logistics and distribution channel management focuses less on schools of philosophical and social analysis and more on the calculus of managing sales campaigns inventory replenishment and income statements the goal of the management scientist like the historian is to merge the facts and figures of the discipline with today s organizational cultural and economic realities hopefully the result will be a new synthesis where a whole new perspective will break forth exposing new directions and opportunities

the field of electrical engineering is very innovative new products and new ideas are continu ally being developed yet all these innovations are based on the fundamental principles of electrical engineering ohm s law kirchhoff s laws feedback control waveforms capacitance resistance inductance

electricity magnetism current voltage power energy it is these basic fundamentals which are tested for in the professional engineering examination pe exam this text provides an organized review of the basic electrical engineering fundamentals it is an outgrowth of an electrical engineering refresher course taught by the author to candidates preparing for the professional engineering examination a course which has enabled scores of electrical engineers in minnesota and wisconsin to successfully pass the pe exam the material is representative of the type of questions appearing in the pe exams prepared by the national council of engineering examiners ncee over the past twelve years each problem in the text has been carefully selected to illustrate a specific concept included with each problem is at least one solution although the solutions have been carefully checked both by the author and by students there may be differences of interpretation also in some cases certain assumptions may need to be made prior to problem solution and since these to individual the final answer may also differ the assumptions will vary from individual author has attempted to keep the requirements for assumptions and interpretation to a minimum

this book covers some established conventional and recent advances in plant breeding methods it highlights and treats in detail some breeding strategies not adequately handled or usually ignored in many plant breeding texts there is in depth coverage of plant resistance mechanisms to various stress factors and application of phenotyping genotyping bioinformatics molecular markers omics technologies biotechnology transgenesis and gene editing in crop improvement topics like germplasm conservation plant sex expression and pollination control recurrent selection methods interspecific hybridisation pre breeding chromosome manipulation and breeding for resistance to diseases and insect pests are comprehensively covered the book gives special attention to some problems that affect food security in developing countries e g parasitic weeds and drought and heat stress breeding for resistance to parasitic weeds like striga broomrapes and cascuta is always ignored in most plant breeding texts where applicable problems and challenges associated with some breeding strategies are highlighted and possible solutions proposed the text is rich in relevant examples for various topics the book is suitable for teaching of plant breeding at the university level and is

also beneficial to practising plant breeders it brings together some relevant work and literary information that is useful to university lecturers students and practising plant breeders the book targets university students in agricultural and plant sciences particularly those taking plant breeding as a key unit course
